Article History	Abstract
Received: 14 th April, 2026 Accepted: 10 th May 2026	It was noted that the reforms being carried out in our country, the effective use of the methods of legal education are important in a responsible period of change. In the era of globalization, scientific and innovative development, it is necessary to adequately use the unique methods of raising the legal awareness and legal culture of the population, the best positive practices of advocacy.
Keywords: state, society, law, civil society, law, legal education, globalization, scientific innovation, aesthetic vision, value, aspiration, knowledge, level.	

In the responsible period of fundamental reforms, changes taking place in our state today, adequate, effective use of various forms and methods of legal education becomes important. For this reason, we must critically assess the level of our legal culture and delve into the cause of our problems. But only by teaching the laws and intimidation with responsibility, we cannot achieve the rule of law and progress. The fact that we do not adequately use special methods of raising the legal consciousness and legal culture of the population, advanced and influential means of propaganda, positive experiences of foreign countries in this regard in the era of modern globalization, scientific and innovative development is proof of our above points. As we all know, in the development of our society, it is important to increase the legal consciousness and culture of citizens, especially young people. At the present stage of further democratization of Public Administration, Modernization and reform of the country in the Republic of Uzbekistan, the demand and need for the legal culture of citizens is growing. Legal culture is characterized by the political activity of the individual, his aspiration for democratic reforms, a sign of a truly civil position.

The development of the legal consciousness and culture of young people is one of the most important conditions for the construction of civil society. It is also no secret to anyone that youth is a decisive force in our society, of course. In addition, in order to raise legal consciousness and legal culture in society, it is necessary to deeply instill in the minds of the younger generation the concepts of law, duty, honesty and purity, as well as moral norms, to teach important aspects of the Constitution of the Republic of Uzbekistan to our children from an early age, to organize legal and educational events, we must carry out such tasks as strengthening the sense of patriotism. In addition to it, there is another important issue, jikhat, which should find a solution in a comprehensive way to the work of forming legal immunity to factors that negatively affect the legal education of some young people, instilling in each person a sense of respect for laws and etiquette, loyalty to national values, intolerance to offenders. Not only in the city, capital, but also in remote regions and cities, maintaining a balance between personal interests in raising public consciousness and legal culture, deep immersion in the minds of the population, while remaining a citizen and an individual, also creates the basis for ensuring the rule of law.

In raising legal consciousness and legal culture in our society, we need to pay the most attention to the content of links:

Knowledge

Aspiration

Spirituality

I treat it as immunity.

The reason is, if every person in society seeks to get enough knowledge, he will certainly master it. In the middle of human beings should be divided into formed spiritual mukhit. If we create this environment, of course on our own, we will have immunity to various regressive circumstances, negative process, factors. And of course we are the one who strives for a bright future, and we will definitely achieve it.

From this we can conclude that “a high legal culture is a guarantee of the development of the country.”

"The great Greek scientist Platon said:" when the people feel the need for laws and study them thoroughly, it only benefits him. Otherwise, the goal pursued by the law cannot be achieved. Indeed, as long as our people do not stand firm against violations of the law, it will be difficult for government agencies, officials to ensure the rule of law no matter how hard they try. Today, our public literally

woke up, and now our people are directly assessing the behavior of people in different positions and learning to express their opinion freely," said Our President Sh.M.Mirziyoyev, at the solemn ceremony dedicated to the 27th anniversary of the adoption of the Constitution of the Republic of Uzbekistan.

In conclusion, it can be said that the more ideological and legal immunity of young people develops, the more an atmosphere of indiscriminate competition and a healthy generation are formed. We are investing all our efforts today to educate such a young generation. Along this path, we all need to be aware of the vices of corruption that poison the human mind, to put our youth on the right path in preventing any negative situations. In the fight against corruption, we need to raise legal consciousness and national education in all segments of the population, take all necessary measures in relation to this, and, moreover, constantly organize legal literacy and aesthetic education, propaganda and propaganda work for our youth.

Uzbekistan As Sh.M. Mirziyoyev said," no matter how bitter and uncomfortable, I just want to know the correct and truthful information, " we, having correctly evaluated all the updates, islamokhots, are obliged to be Wings and shoulders to our president in bringing our state to higher heights.
